OBJECTIVE

Full Stack Developer with hands-on experience building scalable web applications, AI-integrated products. Skilled in designing RESTful APIs, authentication systems, database architectures, and responsive frontend interfaces.

Experienced in developing production-style applications including full stack marketplaces, blockchain token deployment systems, and intelligent web platforms integrating modern AI APIs. Focused on building efficient backend services and delivering scalable user-focused applications.

EDUCATION

Bachelor of Engineering (B.E.) in Information Science and Engineering
Acharya Institute of Technology, Bangalore, Karnataka
2022 – Present | Graduation: 2026
CGPA: 8.35 / 10

12th Grade
Masters PU College, Hassan
Percentage: 94.3%| Year: 2022

10th Grade
GTWA, Hassan
Percentage: 96.96% | Year: 2020

TECHNICAL SKILLS

React, Node.js, Express.js, MongoDB, REST API, MySQL, PostgreSQL, Vercel, API ,Git, GitHub, VS Code, Ganache, Ether.js, Wallet Integration,

Languages: C, Java, Python, JavaScript, Typescript, Solidity.

PROJECTS

1. **Fitness Tracker – MERN Fitness Log Application**

- Built a full-stack fitness tracker for logging workouts, calories, and progress with a React UI.
- Implemented personalized diet recommendations based on user food preferences.
- Added secure JWT-based authentication with protected routes.
- Designed REST APIs for workouts, calorie logic, and user data.
- Used Node.js/Express for backend and MongoDB for persistent storage.

---

2. Property_Hub Production-Grade Real Estate Marketplace

A full-stack MERN platform enabling secure property listing, discovery, and agent–user interaction.

- Built a scalable real estate marketplace using MongoDB, Express, React (Vite), and Node.js with role-based authentication (User & Agent).
- Implemented JWT authentication with HTTP-only cookies and email-based OTP verification for secure account onboarding.
- Developed full property management system including CRUD operations, image uploads via Cloudinary, filtering, pagination, and sorting.
- Designed interactive features such as property saving, notification system, contact agent workflow, and dynamic property detail pages.
- Deployed production-ready frontend and backend using Vercel and Render, with proper CORS configuration and secure environment management.

3**. Token Management & Risk Analyzer – BEP-20 Deployment System**

- Deployed a custom BEP-20 token on BNB Smart Chain Mainnet with secure Solidity contract logic.
- Built a dashboard to display supply, holders, and live on-chain transaction data.
- Implemented a risk engine to detect unusual transfers and assign wallet risk scores.
- Added MetaMask-based interactions for transfers, approvals, and contract execution.
- Integrated MERN + Web3 tools to create a responsive token monitoring interface.
- Tech Stack: Solidity, BNB Chain, Web3.js/Ethers.js, React, Node.js, Express, MongoDB

FIELD OF INTEREST

- Web Development
- Blockchain & Smart Contracts
- Full Stack Engineering
- System Design
- AI integrations

SOFT SKILLS

- Problem Solving
- Adaptability
- Leadership
- Communication

LANGUAGES

- English
- Hindi
- Kannada
- German (A2, in Progress)
- Japanese (A2, in Progress)

HOBBIES

- Gym & Fitness
- Books
- Building automation tools and MVPs
- Videography
- Editing
