SUMMARY

Full Stack Developer with experience in React, FastAPI, Node.js, and AI-assisted workflow systems. Interested in backend engineering, automation pipelines, NLP systems, and intelligent workflow orchestration.

PROJECTS

Property_Hub - Full Stack Real Estate Marketplace

[Live](#) | [Github](#)

- Built a full-stack real estate platform with role-based authentication, JWT security, REST APIs, and secure property management workflows, including filtering, pagination, and Cloudinary image uploads

Smart_Form - Intelligent Form Automation System

[Live](#) | [Github](#)

- Built an NLP-driven workflow system to extract structured information from user inputs and automatically map data into dynamic form fields with duplicate detection and AI-assisted follow-up suggestions

EXPERIENCE

Software Developer – AIVOA Bangalore, India | May 2026 – Present

- Researching AI-driven CAPA workflows using agentic orchestration and intelligent workflow automation systems
- Contributing to RCA automation, AI-assisted investigation pipelines, and LLM-based action planning systems

Generative AI Intern — Bharat Unnati Remote | Jan 2026 – May 2026

- Worked on Generative AI workflows, prompt engineering, and AI-assisted automation systems
- Explored NLP-based processing and LLM-driven workflow experimentation
